SUMMARY

Aspiring Java Backend Developer with strong knowledge of Java, Spring Boot, Spring Data JPA, Hibernate, Spring Security, and Microservices. Skilled in developing REST APIs, implementing authentication and authorization, and working with service discovery and inter-service communication. Familiar with Apache Kafka and Redis for messaging and caching, with practical project experience using Docker, Git, GitHub, SQL, OOP, and Data Structures & Algorithms. Eager to apply technical skills to build scalable and maintainable backend applications and grow as a software developer.

EDUCATION

B.Tech Information Technology

RCC Institute of Information Technology, Kolkata, West Bengal | CGPA: 7.93

2021 – 2025

Senior Secondary (Class XII)

Govt. (+2) High School, Munger, Bihar | Percentage: 82%

2018 – 2020

Secondary (Class X)

Govt. (+2) High School, Munger, Bihar | Percentage: 73.6%

2017 – 2018

SKILLS

Programming Languages: Java, SQL

Backend Development: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs, JDBC, Servlets

Frontend Development: HTML, CSS, JavaScript, React, Bootstrap

Microservices: Spring Cloud, Eureka, Service Discovery, Inter-Service Communication, API Gateway, OpenFeign, Load Balancing

Messaging & Caching: Apache Kafka, Redis

Databases: MySQL, Oracle, MongoDB

Core Concepts: OOP, Data Structures & Algorithms, MVC Architecture

Tools: Git, GitHub, IntelliJ IDEA, Eclipse, Maven, Postman, Swagger/OpenAPI

DevOps & Cloud: Docker, Kubernetes, AWS

PROJECTS

Banking Web Application

<https://github.com/shivampal108/Banking-app-backend>

2026

Tech Stack: Java, Spring Boot, REST APIs, Spring Security, Spring Data JPA, MySQL

- Developed a monolithic banking application using Java, Spring Boot, Spring Security, Spring Data JPA, Hibernate, and MySQL.
- Designed RESTful APIs for registration, login, account creation, deposits, withdrawals, fund transfers, and transaction history.
- Implemented authentication and authorization using Spring Security to secure banking endpoints and protected resources.
- Integrated JPA and Hibernate for ORM, entity mapping, database persistence, and CRUD operations.
- Implemented input validation and exception handling for invalid requests and application errors.
- Tested REST APIs using Postman, covering authentication, account operations, transactions, and error scenarios.

Event Management System

<https://github.com/shivampal108/MS-EventManagement-system>

2026

Tech Stack: Spring Boot, Microservices, JWT Security, MySQL, Kafka, Redis, Docker

- Developed a Microservices-based Event Management System using Spring Boot, with independent services for modular and scalable backend development.
- Designed and developed REST APIs for event management and implemented service discovery and inter-service communication using Eureka and RestTemplate.
- Implemented Apache Kafka for asynchronous, event-driven communication and Redis for caching.
- Secured REST APIs using Spring Security and JWT-based authentication and authorization.
- Integrated Spring Data JPA, Hibernate, and MySQL for database persistence and entity management.
- Containerized microservices using Docker and managed source code using Git/GitHub.

CERTIFICATIONS

- Java Certification – Udemy
- SQL Certification – HackerRank
- HackerRank: 4-Star Rating
- LeetCode: Solved 100+ Problems
- Naresh IT Mega AI Hackfest 2026 – Participant
